Objectives

- Reviewing Subversion
- SLogo Design
- Course evaluations

Review: Subversion

- What is Subversion?
- What are some benefits of Subversion?
- Where is the code and its versions stored?
- Commands
  - ➢ What is the command to get the latest version of the code?
  - ➢ What is the command to make your version of the code public?

Using Subversion

- Notes:
  - ➢ Modified code is marked with *
  - ➢ URL structure
    - • <protocol>://<location>

- Any problems?
- Anyone have it working remotely?

SLogo Timeline

- Friday, Dec 5: demo application (group)
- ??: final implementation due (group)
  - ➢ Decide as a group what your deadline is
- Fri, Dec 12: "Post-mortem" (individual)

Project Analysis: Due Dec 12

- Written document
  - ➢ Acceptable formats: PDF, text, doc (not docx)
- Parts:
  - ➢ Description/Overview
  - ➢ Planning
  - ➢ Status – what code became, testing, design
  - ➢ Code analysis conclusions
  - ➢ Collaboration
  - ➢ Future work

Expectations for Friday

- Present what has been completed
  - ➢ At least use case from prep document: "FD 50"
- Discuss any design issues/challenges you've met so far
  - ➢ Interesting discussions/conclusions
  - ➢ How you'd change if you were to do something similar later

Progress and Design Questions

- What are the interfaces between related components?
  - ➢ Trace through the use case
- Any interesting design discussions so far?
- Any change in assessment of work required for various parts?
- Decisions on 3 extensions?

Division of Labor

Course Evaluations

- Volunteer to take to CS office when all are completed
